Den European Aluminium Award 2008 in der Kategorie „Consumer Products“ für Innovation erhielt Alurunner Germany mit dem „Alurunner-Schlitten“. Die X-förmige Konstruktion des Rahmens, verbunden mit elegantem Design, gab der Jury den Ausschlag, den Innovationsaward an Alurunner zu verleihen. Der Alurunner ist das weltweit erste Rodelgerät mit echter Federung durch einen einstellbaren Stoßdämpfer.

The European Aluminium Award 2008 in the category Consumer Products for Innovation is awarded to: ALURUNNER GERMANY WITH THE ALURUNNER SLED. The shape, the X construction of the frame combined with an elegant and innovative design, is for the jury the reason to give this innovation award to Alurunner.

## WINNER OF THE EUROPEAN ALUMINIUM AWARD 2008

### Category CONSUMER PRODUCTS - INNOVATION

Company: **Alurunner**  
Country: **Germany**  
Product Name: **Alurunner Sled**

Alurunner® the world's first sled with real shock absorption through an adjustable shock absorber system - represents a new age sledding concept.

The Alurunner® is manufactured with the highest possible technical standards. All materials are innovative and extremely durable.

#### Aluminium frame

The entire frame of the sled is made of aluminum tubing (Alu 6061) and of a nice design. The wide aluminum runners with PE-glide profiles are a guarantee for optimal gliding and tracking qualities. The effective brake with the aluminum claw is extremely durable, easy to use, and grips precisely under the center of mass in the snow.

#### Space-saving

The collapsible light aluminum frame makes space-saving easy storage and transport possible.

- Measurements packed in the carrier bag:  
109 x 47x 16 cm
- Weight: 9.5 kg
- Driver weight: max. 100 kg
